

GANTRY CRANE

SEVENCRA

ABOUT US

SEVENCRAINE (Henan Seven Industry Co., Ltd.) is a reliable and professional crane manufacturer, with its factory located in Henan Province, the largest crane manufacturing base in China. We are engaged in the design and manufacturing of cranes and have obtained certifications such as ISO, CE, EAC, SGS, etc.

SEVENCRAINE adopts European standards and combines years of experience in the crane industry to establish SEVENCRAINE brand products that meet international market demand. As of now, we have exported cranes to over 120 countries and regions worldwide. We are committed to providing high-quality products and comprehensive services to our esteemed customers, helping them improve work efficiency, and providing support for their development and expansion.

SEVENCRAINE products are applied in the following industries: steel industry, precast concrete plant, waste incineration power generation and biomass industry, paper industry, automobile industry, port machinery industry, manufacturing industry, and power industry. We can provide you with various optional functions based on the special lifting needs of your industry, such as electronic anti sway, remote monitoring, lifting synchronization, and more.

20

Years

More than 20 years of industry experience

120+

Countries

more than 120

Every year

Arrange engineers to conduct global inspections irregularly every year

Installation

Provide overseas installation and maintenance services

Agent

We are looking for global cooperative agents, installation and maintenance service providers, and local agents.

24h

Online

Our customer service is available online 24 hours a day to serve you

PRODUCT PRESENTATION

Double Girder Gantry Crane

- Load capacity: 5t-300t
- Crane span: 12m ~35m or customized
- Lifting height: 6m-18m or customized
- Hoist unit: hoist trolley or winch trolley
- Working duty: A5,A6, A7
- Power source: based on your power supply

Single Girder Gantry Crane

- Load capacity: 3t-32t
- Crane span: 4.5m ~ 30m or customized
- Lifting height: 3m to 18m or customized
- Hoist unit: wire rope hoist or chain hoist
- Working duty: A3, A4, A5
- Power source: based on your power supply

Semi Gantry Crane

- Load capacity: 3t-50t
- Crane span: 4.5m ~32m or customized
- Lifting height: 3m to 18m or customized
- Hoist unit: hoist or trolley
- Working duty: A3, A4, A5, A6
- Power source: based on your power supply

Container Gantry Crane

- Load capacity: 20t-45t
- Crane span: 12m-35m or customized
- Lifting height: 6m-18m or customized
- Hoist unit: Open winch with anti-screwing structure
- Working duty: A5, A6, A7
- Power source: based on your power supply

Straddle Carrier

- Load capacity: 20t-80t
- Crane span: 12m ~ 35m or customized
- Lifting height: 6m to 18m or customized
- Hoist unit: Hydraulic cylinder powered
- Working duty: A5, A6, A7
- Power source: based on your power supply

Marine Travel Lift

- Load capacity: 5t-500t
- Crane span: 5m-35m or customized
- Lifting height: 3m to 30m or customized
- Working duty: A3, A4, A5, A6, A7
- Working temperature: -20-40 °C

“

SINGLE GIRDER GANTRY CRANE

The single girder gantry crane is a common industrial lifting equipment with a single-beam structure on the top and runs on the track. Since the maximum lifting capacity of the electric hoist is 32 tons, the lifting capacity of the single girder gantry crane is usually no more than 32 tons. SEVENCRAVE single girder gantry crane is suitable for a variety of indoor and outdoor scenes, such as docks, cargo yards, warehouses and construction sites, and can complete most material handling work, so it is very popular.

30m

DOUBLE GIRDER GANTRY CRANE

Engineered for severe-duty cycles, double girder gantry cranes excel in heavy-load handling, high-intensity operations, and specialized industrial environments such as steel mills, shipping yards, and power plants. Their design surpasses single girder configurations in both structural integrity and functional complexity, offering enhanced load-bearing capacity, extended span capabilities, and adaptability to extreme working conditions.

While customization options for span, lifting height, and operational speed require detailed engineering consultation, our commitment remains unwavering: we prioritize safety and longevity over cost-cutting compromises, ensuring every crane delivers decades of reliable service. For technical specifications, load charts.

SEMI GANTRY CRANE

When heavy lifting is required in confined spaces or environments with limited height, or when the full reach or cost of a full gantry crane is not required, a semi gantry crane is the ideal solution. By combining the advantages of an overhead crane and a gantry crane, this design is more compact, cost-effective and versatile for a variety of operating environments.

When lifting capacity does not require the strength of a double-girder system, the single girder semi gantry crane for sale is a lighter, more cost-effective option. It is typically designed to lift lighter loads, with excellent flexibility, making it ideal for tasks with limited space or less demanding lifting requirements.

”

For operations that require higher lifting capacity and enhanced stability, the double girder semi gantry crane for sale is the ideal solution. It features two parallel beams instead of one, providing greater strength and is suitable for lifting heavier loads in more demanding environments.

CASE PRESENTATION

SEVENCRAVE have successfully delivered numerous crane solutions to clients worldwide, offering comprehensive services from consultation, design, and production to delivery and after-sales support. Additionally, we have a proven track record of global projects, with our experienced technicians providing on-site support to ensure each project is completed efficiently.

SEVENCRAVE provides customized gantry crane services for each client. Starting with a thorough needs analysis, we develop tailored solutions based on your project's specific applications and unique requirements, including specification adjustments and technical configurations. We work closely with you to confirm all technical details, ensuring compliance with your operational processes and safety standards. Additionally, we offer tailored transportation and installation plans, along with personalized after-sales services, to ensure your equipment operates at peak efficiency at all times.
